Maybe even better than free.

Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. This is easy, fast and reliable filehosting! You don't need any kind of premium-accounts. File is free to use with no gotchas and no hidden fees. Keep your files private, or send your download links only to friends or family. Just upload the file you want to share with your friends and we send you a download link to your file. So try our free and simple filehosting service now. You don't need any special software installed to be able to download your files. You can upload any type of file (movies, music, documents, images, zip files and more). Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costing you money in data storage fees. It is also allowed to link to the download page from websites and communities.Alternatively you can choose to share your download links on blogs, forums and social networking sites. Files can be downloaded from any computer from ourhigh speed servers. We have no file size limit. You decide who you want to share your files with. The cost of that data transfer is covered by your internetservice or the data plan on your phone. When you use file, you avoid storing the file you're sending in your cloud storage or mail server. You can give thisdownload link to your friends by mail or instant messenger. Our service is completely free for everyone. There are no restrictions on the number of times a filecan be downloaded. If only we could, we surely would! On the other hand, using file can actually save you money. No account or credit card is required to getstarted. Unfortunately, we can't make that part free. Simply upload your file and share the link. Any file in any format can be uploaded and downloaded forfree. Using file, you can circumvent those limits without paying to upgrade your team chat service. filehosting provides an easy possibility for you to send largefiles to your friends. Your wallet will be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between yourcomputer or phone and our servers, then from our servers to your friends device.
